e-Learning tool ALPANINO

This electronic course on alpine plant ecology was originally designed as ALPECOLE as part of virtual campus Schweiz in cooperation with University of Zürich. The contributions by ALPFOR that dominated that course were re-edited in 2008 as ALPANDINO in both English and Spanish in cooperation with DEZA. Its contents reflect research experience at ALPFOR. The course is currently used for preparation by participants of the Alpine Plant Ecology Summer School at ALPFOR.
